

Bioinformatics

2. Bioinformatics services

a. Emboss and wEmboss:

Access to [Emboss](#) software is available on emboss.uit.tufts.edu , which provides both shell and web access. In both cases you will need an account. You may request an account at <http://research.uit.tufts.edu> . The server hardware is a single quad core 64 bit host with 4 gig of ram.

For shell access to command line tools:

```
> ssh -Y emboss.uit.tufts.edu
```

For access to the [web interface](#) wEmboss.

For access to [emboss web](#) documentation.

Emboss [tutorial](#)

If you have any questions about Emboss related usage, applications, or assistance with software, please contact bio-support@tufts.edu.

b. Tufts Center for Neuroscience Research Genomics Core

The Tufts CNR Genomics Core supplies links to bioinformatics resources related to their operation. See [Tufts CNR Genomics Core Resources](#) for more information.
