

# Student Work Zone - Fall 2007

Students in the Intro GIS course may create sub-pages (children) in this area for submitting their assignments. **Note: you have to log in to do this (log in function is in the upper right corner above) - use your UTLN user name and your e-mail password.**

A page (also called a "child" - see the "children" below) should pertain to your individual work (e.g., add a page called "Parmenter" then create sub-pages under that for your assignments. To create a new page, click on **Add Content** (left column), then **Add Page**. To edit an existing page, click on that *page* then click on **Page Operations** (left column) - **Edit**. Attachments can be added by clicking on the *appropriate page* below, then clicking on **Page Operations - Attachments**.

See the *Parmenter Example* below for more instructions (Assignment 1 page).

You should restrict editing of your page to yourself, and you may restrict viewing of your page to the instructor and TA. E-mail them if you need to know how to do this.
