Early Algebra Teacher Resources Home Page

Welcome to the Early Algebra Teacher Resources Site. This site collects different kinds of information that teachers may find useful as they begin to think about implementing early algebra activities in their classrooms:

1. Implementations carried out by other teachers
2. Classroom activities with detailed lesson plans, handouts, and overheads
3. Our project videos, illustrating some of the activities described on this site

We welcome your feedback and look forward to hearing from you if you have any questions.
