

x-intercept

x-intercept

Middle School Lessons

1. **Candy Experiment** - Students will create their own data to construct a graph and equation of negative and fractional slope.
2. **Jason's Tree House** - Students will extract data from a story and use tables and graphs to answer questions about proposed scenarios.
3. **Graphing Equations** - Students will practice moving between graphs and equations of functions, as well as identifying the y-intercept and slope.
